

**NEW!**

**Big Dutchman®**

## **RelaxGo**

The automatic colony nest for broiler breeders  
– no manure pit or slat level –

# RelaxGo – high nest acceptance and perfect hatching egg quality

The new colony nest **RelaxGo** from Big Dutchman is ideal for broiler breeders that are kept in day-old-to-death production systems. Using winches, the entire nest row can be automatically lifted up under the ceiling and lowered back down into the litter after the

rearing phase. The nest then grows with the litter so the entrance to the nest is always at the optimal height for the birds, thus increasing the hens' nest acceptance. There is no need for a manure pit and the corresponding slat level. Gentle and automatic egg transport ensures a

high hatching egg quality with minimal effort. Let our experts advise you about the innovative products for broiler breeder management Big Dutchman can offer you.

RelaxGo with perforated nest insert and ejection tube

EggTrax egg belt drive ensures secure egg transfer at any height

## Important technical features

- ✓ the nest cover is easy to open for bird inspection;
- ✓ a tube closes the nest for the night so the hens cannot roost in the nest;
- ✓ three hinged-type approach perches make it easy for the hens to access the nest;
- ✓ the perforated nest insert made of plastic ensures perfect comfort during laying;
- ✓ a nest depth of 470 mm reduces the eggs' rolling-off distances;
- ✓ the clever nest design does not use wood to allow for optimal hygiene and cleaning;
- ✓ a central egg belt (400 mm wide) with egg belt brush automatically transports the eggs to the collection table;
- ✓ an egg belt tension unit compensates for the linear expansion of the egg belt;
- ✓ the patented posts come with an automatic locking and unlocking function (optional);
- ✓ the nest's substructure is made of corrosion-resistant materials.

## The advantages at a glance

- ✓ ideal for day-old-to-death production systems: nest is lifted up under the ceiling during the rearing phase;
- ✓ low nest entrance for increased nest acceptance;
- ✓ RelaxGo grows with the litter so the entrance height remains the same for the entire laying period;
- ✓ automatic, gentle egg transport for a high hatching egg quality;
- ✓ no need for a manure pit with slat level;
- ✓ flexible arrangement of nest sections and passages;
- ✓ easy retrofitting of existing broiler breeder houses to an automatic nest with automatic egg transport.
