## **Imperator**

The feed pan family  
for professional rearing and growing of turkeys

# Imperator – the correct pan for any production cycle

A feeding system for turkeys must meet a number of requirements that depend mainly on the production cycle and the birds' age. During rearing, the feed must be easily

accessible for the poults. Later, during hen and tom growing, keeping feed wastage to a minimum is a major concern. Easy-to-exchange dishes and cones help the turkey producer to create ideal

conditions for his birds at all times. Let our experts advise you to find the best solution for your individual requirements.

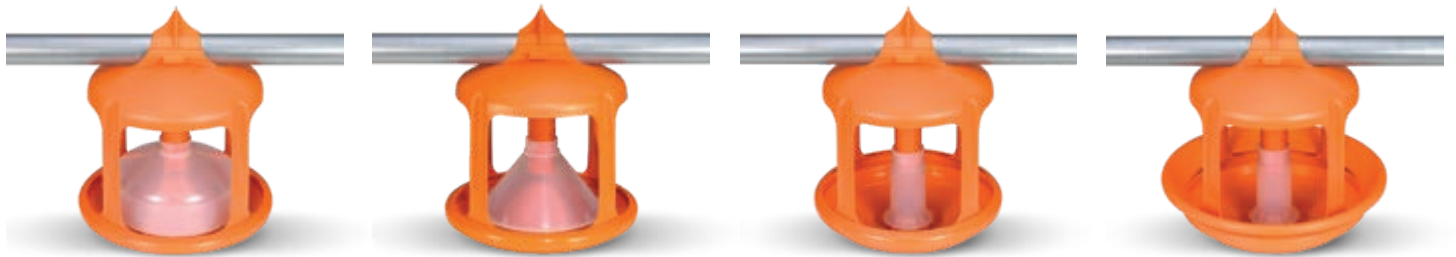

## Modular design of the feed pan

The standard diameter of transport pipes for rapid and adequate feed supply in turkey houses is 60 mm. For short systems, we also offer a 45 mm

pipe that is easy to install thanks to an adapter. All pan versions use the same grill. The pan dishes have different heights and an added

feed-saving lip for the final growing period. The soft edge of this lip prevents breast injuries. A control pan at the end of each feed line ensures

that all pans are refilled regularly.

### Hygiene pan / rearing

- 0 to 3.5 kg
- hygiene cone – the poults cannot enter the pan

### Standard rearing pan

- 0 to 11 kg
- pan cone – the feed is close to the pan rim

### Hen growing pan

- up to 13 kg
- 9.5 cm pan rim height – no feed wastage

### Tom growing pan

- up to 27 kg
- 13.5 cm pan rim height – no feed wastage

## The advantages at a glance

- ✓ modular design of the pan and simple replacement of individual parts make for high flexibility;
- ✓ feed flow is easy to check thanks to the transparent cone;
- ✓ hygiene cone stops poults from entering the pan;
- ✓ pan dish with cone provides the birds with small amounts of feed that are always fresh;
- ✓ good accessibility to the feed;
- ✓ easy to mount and to clean due to the low number of parts;
- ✓ high quality of the materials used;
- ✓ 4-arm grill ensures a stable shape, easy access to the feed and a good illumination;
- ✓ curved, soft pan rim prevents breast bruising;
- ✓ pan can swing freely at the pipe.
